

ABSTRACT

Inexpensively manufactured device permits a eye mask, eyes cover, face shield or mask, sleep shade or sleep mask, light shade, blindfold, eye patch for a single eye and/or
5 other such facial cover, to hold a single or a grouping of hygienic plastic, paper or other hygienic material in a removeable fashion so that easy cleaning can be effected after use and/or the hygienic article can be discarded so that the post-use impure material does not contact again the same or a different user's face. The device of this invention may also be impregnated with a scent and/or a cream, gel or other element to impart a substance or
10 treatment onto eyes and/or face over a prolonged period.
